

# ***For the Love of the Earth... Compost!***

*Over 50% of materials that are discarded in our landfills are organic residuals from households. Leaves, food scraps and certain soiled papers are just some of the many materials that can easily be composted at home with a backyard composting bin. Not only does composting save space in our precious landfills but it helps return valuable nutrients to the soil through the creation of COMPOST, the single most important ingredient for soil health and vitality.*

*On behalf of White River Co-op and the Center for Sustainable Living, we would be honored to have you join us at our upcoming EARTH MACHINE™ Compost Bin distribution event to the residents of Bloomington, Indiana. Let's celebrate the power that each of us has to make an environmental difference in our community.*

**DATE:**                    **Saturday September 20th, 2008**

**TIME:**                    **9am to 4pm**

**LOCATION:**            **White River Co-op, 1305 West Bloomfield Road (W. 2nd St.)**
